

I'll do the sponges. To add 36 sponges plus 17 sponges...

36 + 17

...I can take 4 of these loose sponges and put them with the pack.

That gives me $40 + 13 = 53$.

40 + 13 = 53

Right. Or, you could take 3 sponges from the pack and put them with the loose sponges.

Then, you have $33 + 20 = 53$.

33 + 20 = 53

Either way, the addition is easier.

And the number of sponges doesn't change.

Let's count the fizzing mop bucket tablets.

We have two full packs.

There are 75 tabs in this ultra pack, and 128 tabs in this mega pack.

75 + 128

Deluge ULTRA

Deluge MEGA

Find the sum.
